MY OBJECTIVE

My objective as a Technician is to apply my technical skills in IT craftsmanship and IT implementation, and utilize my knowledge in software configuration and troubleshooting to fulfill the company's vision and mission. I aim to bring success to the company by designing specific IT solutions that will address technical issues usually encountered in a development environment. My solid expertise in software development , software modification, plus my first-rate knowledge in Java and Android applications are very beneficial in meeting the company's technical requirements. I am a team player, open to adapt changes and a strong problem solver. With this said, I can assure that I can be a useful talent of the company.
